ONE GALLON CONTAINER STOCK

CONTAINER GROWN STOCK

The introduction of Container Grown or Canned Plants is relatively new in our Southwest areas. Nevertheless, its rapid acceptance by the Nursery trade and general public proves its practical value.

Canned Plants are helping in a large way to make the landscape business a year round enterprise rather than seasonal as heretofore. Canned Plants are taking the summer slump out of salesyard receipts. An attractive display of plants throughout the summer will pay for the operation of a retail yard and bring profit to the owner as well.

Plants growing in cans may be harvested in any kind of weather. A truck may be loaded without advance notice of arrival, and the stock moves without loss.
